Carlos Luque Ruiz

QA Engineer

LinkedIn: linkedin.com/in/carlos-luque-ruiz-746853b2 · Open to remote & international teams

Summary

QA Engineer with 5+ years of experience in functional validation, regression, API, hardware and product support in regulated environments, including ISO 9001 quality frameworks. Practical mindset: detect risks before production, design tests that cover the real business, coordinate end-to-end validations and communicate findings clearly. Experience across lotteries, point of sale, CMS, printers, embedded devices and tech migrations. Building a Playwright automation portfolio (iOS, Android, web). Languages: Spanish (native), English (C2), French (C1).

Experience

QA Engineer — mkodo (via Pollard Banknote) · Newcastle upon Tyne, UK · 2024 – present

- Manual end-to-end testing on iOS, Android and web, supporting quality and production releases for lottery and point-of-sale solutions.
- Digital scratch games for a lottery company: game behaviour, outcomes and cross-platform journeys.
- Lottery mobile apps: iOS & Android QA owner for 2+ years; validated migrations .NET to Swift (iOS) and Xamarin/.NET to Kotlin (Android).
- Point of Sale (ticket sales): E2E coordination from product conception to final sale, incl. tablet-printer integration and critical scenarios.
- Retail Lottery Management System: QA for promotions, assets, games, stock, store schedule and POS operations.
- API validation with Postman and Charles Proxy; hardware testing (printers, tablets, Rockchip boards, Raspberry Pi); demos to clients and management; AI-assisted QA (acceptance criteria analysis, defect triage, log review, scenario generation).

Senior QA Tester — tombola · Sunderland, UK · 2021 – 2024

- Manual and regression testing of Bingo and Arcade products on Android, iOS, Windows and macOS; fortnightly releases across four platforms.
- Payment QA (VISA, Mastercard, Amex, prepaid, PaysafeCard, SEPA, PayPal): deposits, withdrawals, reconciliation, SQL database checks.
- Fraud pattern monitoring and suspicious transaction investigation in a fully regulated gambling environment.
- API validation with Postman, defect documentation, cross-platform testing of game flows, promotions, account navigation and payments.

Customer Support Advisor — tombola · Sunderland, UK · 2019 – 2021

- Front-line support (phone, chat, email) with focus on responsible gambling; CRM/CMS administration, initial bug reporting and feedback loop between users and QA.

Skills

Manual testing: Functional & exploratory, regression & UAT, release validation, bug reporting & risk analysis, hardware & device testing
Automation & dev: Playwright, JavaScript, Appium, Python (basics), Git & Jenkins, CI/CD integration
Tools: TestRail / QMetry / XRAY, Jira & Confluence, Postman & Charles Proxy, Firebase & Google Analytics, SQL, GitHub Copilot / Claude / Cursor
Platforms: iOS & Android, web (cross-browser), Swift / Kotlin / React Native, .NET / Xamarin

Certifications & Education

- **ISTQB Certified Tester Foundation Level (CTFL)** — International Software Quality Institute · Issued Aug 2023 · Credential ID 23-CTFL-232229-06
- HyperionDev – Software Engineering Bootcamp (Python fundamentals), 2023
- BA in Translation & Interpreting (French & English), Universidad de Córdoba, 2013–2017

Projects

- **QAQEST** — free practice-exam platform for ISTQB-aligned software testing certifications (1000 practice questions authored; timed mock exams, practice mode, progress tracking; static site on GitHub Pages). https://brutecarlos.github.io/qaqest/
- **Playwright automation portfolio** (in progress) — E2E automation for iOS/Android app scenarios and critical web journeys.
